Professional Summary

Frontend Developer with 3+ years of experience delivering responsive, high-performance web applications across React.js, WordPress, and PHP. Known for leading projects end-to-end, squashing 500+ production bugs, and shipping clean, user-centric UI that drives engagement. Now focused on bringing that same precision and passion to a forward-thinking product team.

Experience

Colan Infotech Private Limited

Vellore

Software Engineer

01/2021 - 04/2024

- Led frontend development for VirtualStaff, IMF, and LightUp projects, delivering optimal performance and cross-device compatibility.
- Managed end-to-end WooCommerce website development from scratch through UAT, including change requests and defect resolution.
- Identified and resolved 500+ production bugs across design (HTML/CSS), functionality (JavaScript/jQuery), and backend (PHP) layers.
- Optimized WordPress websites for SEO and page speed, improving user engagement and reducing load times significantly.
- Created and optimized email templates, conducted code reviews, and mentored junior developers.
- Collaborated with designers and QA teams to deliver high-quality applications aligned with project deadlines.
- Managed server-side updates and ensured smooth deployment processes.
- Collaborated with cross-functional teams, including designers and QA testers, to deliver high-quality web applications, ensuring alignment with project requirements and deadlines

Vsplash

Wordpress Developer

11/2025 - 02/2026

- Developed and customized WordPress websites with responsive design using HTML, CSS, and JavaScript.
- Performed theme customization, plugin integration, and UI/UX enhancements for improved user experience
- Resolved design and functionality bugs to ensure smooth and stable website performance.

Projects

MediPanel – Medical Admin Dashboard

Tech: React.js

Built a comprehensive Medical Admin Dashboard with intuitive data visualization, patient record management, and doctor profile tracking. Delivered a clean, responsive UI for efficient healthcare administration.

eCommerce Web Application

Tech: React.js, React Router, Context API

Developed a fully functional eCommerce platform featuring product listings, category filters, search, shopping cart, user authentication, and secure checkout with reusable components and optimized performance.

LightUp Temple

Tech: WordPress, HTML, CSS, JavaScript, jQuery

Led frontend development of an interactive WordPress web app with custom UI/UX design. Optimized for performance, integrated plugins, and resolved server-related bugs.

Volthive – WordPress Optimization

Tech: WordPress, Elementor

Improved SEO, performance, and user experience across multiple WordPress websites using Elementor and custom designs.

Gracious express

Php , My sql

The "Gracious express" project was an endeavor where I played a crucial role in developing and maintaining a highly dynamic and responsive web application. My primary responsibilities included working on the frontend using jQuery, JavaScript, and design elements, with additional contributions to the backend using PHP.
